

COLORECTAL CANCER: AM I AT RISK?

Colorectal Cancer (CRC) Disparities in the U.S.

Did You Know?

Disparities are driven by socioeconomic status and differences in access to early detection and treatment³

American Indians and Alaska Natives are the only groups for which CRC death rates are not declining³

Blacks and Hispanics are less likely to get prompt follow up after abnormal screening results and more likely to be diagnosed with late stage cancer^{3,4}

CRC rates in Japanese men are 23% higher than in Non-Hispanic White men³

When diagnosed at an early stage, survival rates are similar across all racial and ethnic groups³

What Should I Do?

Ask your primary care or GI physician about available CRC screening options⁵

Schedule a colonoscopy or FIT stool test at age 45⁶
